

Solar Sources/Home-Efficiency Resources sustainable business practices

Solar Sources/Home-Efficiency Resources pursues a range of sustainable business practices intended to minimize our carbon output and waste while improving the efficiency and value of local homes and businesses, including:

- ☒ We utilize proven, long-lasting components to insure that our solar energy systems will last for decades.
- ☒ Our truck features an aerodynamic, light weight fiberglass body for improved efficiency and is run on a biodiesel blend.
- ☒ This truck which serves as our workshop on wheels is left at the site during the installation, while we carpool when possible in higher mpg vehicles.
- ☒ We source materials from suppliers committed to minimizing their carbon footprints and packaging materials.
- ☒ We recycle aggressively including sorting scrap metals, cardboard, paper, etc.
- ☒ We are committed to continuous improvement, striving to find better, safer, and more efficient and effective ways to do our work.
- ☒ We purchase recycled content office supplies.
- ☒ In summary, we reduce, reuse and recycle conscientiously.
